

PLANT-ANIMAL INTERACTIONS

BIO SCI 333/ENVR SCI 390/PBC 470

SPRING 2020, T&Th 12:30–1:50

w/ Prof. Paul CaraDonna

This course will explore the diversity of interactions between plants and animals, including antagonistic interactions (e.g., herbivory), mutualistic interactions (e.g., pollination, seed dispersal and ant-plant associations), and interactions involving multiple species and across trophic levels.
