

Plant Community Ecology

PBC 402/BIO 349

Winter Quarter 2023

Tuesday & Thursday 12:30-1:50 pm

This is a classroom-based course that will focus on the processes that structure ecological communities. We will read primary literature and discuss topics in community ecology. Students will gain an understanding of the history of community ecology as a field, and current methods used in community ecology research. Taught by Dr. Amy Iler. Questions?
